

PERECTING VIRTUALIZATION

About Us

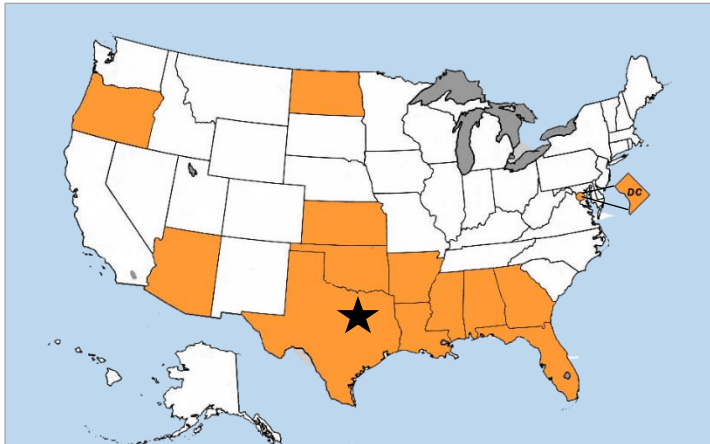

WHO WE ARE

HVE ConneXions was started in 2010 with an engineering philosophy of creating Manageable, Scalable, Reproducible, and Predictable (MSRP) solutions based on proven virtualization technologies running on high-performance next generation hardware. HVE ConneXions was founded to help corporate, government, and educational institutions by delivering world class technology solutions while incorporating the values of passion, integrity, commitment, and loyalty.

Based in Dallas, HVE is a company that manufactures virtualization “appliances.” Our mission is to simplify the complex world of virtualization. We take pride in providing solutions and engineering appliances that can handle all types of workloads including desktops, servers, databases, and operating systems. The result is an overall cost-effective, efficient, reliable, and high-performing environment that scales to customers’ needs.
